SKILLS

- CI/CD
 - Jenkins, GitHub Actions
 - CI/CD pipeline Design
- Containers & Orchestration
 - Docker
 - Kubernetes Basics
 - Helm Basics
- Cloud & Infrastructure
 - AWS
 - Terraform Basics
- Version Control
 - Git, GitHub
- Monitoring & Logging
 - Prometheus
 - Grafana
- OS & scripting
 - Linux (ubuntu)
 - Shell scripting
- Security & quality
 - SonarQube
 - OWASP Dependency-Check

LANGUAGE

- English
- Nepali

SUMMARY

Motivated DevOps Engineer with hands-on practical experience in making CI/CD pipelines, working with Docker, and deploying apps on Kubernetes. I have used tools like Jenkins, GitHub Actions, Terraform, ArgoCd, Helm, and customize in my projects. I enjoy learning new technologies and building real projects, which are shared on my GitHub & Linkedin.

PROJECTS

- CI/CD Pipeline for Microservices Application (Jenkins + Docker + Kubernetes)
Designed and implemented a full CI/CD pipeline using Jenkins for a microservices-based application. Automated build, test, Docker image creation, and container deployment on Kubernetes.
https://github.com/Keys0123/micro_Application.git
- ChatBot Application Automation, Deployment & Security (EKS + SonarQube +)
Created timely backups at 10pm everyday using Cronjobs of application backend and database, Used sonarQube for checking code quality and security analysis.

TRAINING / CERTIFICATION

- DevOps Training
Mindrisers Institute of Technology / 2025

Completed hands-on DevOps training covering AWS, Docker, Kubernetes, Jenkins, Terraform, Linux, shell scripting, and monitoring tools like Prometheus & Grafana. Built and deployed real-world projects as part of the course.

EDUCATION

- April, 2022 - Present

I am currently pursuing a Bachelor in Information Management (BIM) at Asian School of management & Technology, Kathmandu, Nepal, and I am in the 8th semester. I am expected to graduate in April 2026.
